CALL FOR PAPERS

Institute of Statistical Research and Training (ISRT)

Special Issue on *Longitudinal Data Analysis and Related Topics*

The Journal of Statistical Research (JSR), the official journal of the Institute of Statistical Research and Training (ISRT), University of Dhaka, invites manuscripts for a special issue devoted to original research in the broad areas of longitudinal data analysis. The anticipated publication date for this issue is June 2024 (Volume 58, Number 1).

AIMS AND SCOPES OF THE SPECIAL ISSUE

The past few decades have witnessed remarkable developments in statistical methods for analyzing longitudinal data. Despite these developments, researchers often rely on statistical tools that do not adequately account for longitudinal study designs. The goal of the special issue is to provide a venue to present new developments in statistical methods for the analysis of longitudinal or clustered correlated data observed frequently in biomedical research.

SUBMISSION INSTRUCTIONS

Authors interested in contributing to this special issue should prepare manuscripts following the submission guidelines of the JSR, which can be accessed at <http://jsr.isrt.ac.bd>.

Two copies (PDF) of the manuscript, one with the author information and the other without author information (to facilitate double-blind peer review) should be sent to JSRsubmit@isrt.ac.bd. A LaTeX source file of the accepted manuscript should be provided.

All submissions will be received, reviewed, and managed by the JSR editorial policy. When submitting the manuscript, please indicate that your manuscript is intended for the special issue. For further information on the JSR and its submission process, please visit the journal website <http://jsr.isrt.ac.bd> or contact any of the editors.
